

The Love and Romance Map

The Love and Romance Map shows geographic areas where you are more likely to attract love and romance into your life.

Areas on the map that are tinted with a red color are the best areas for attracting love and romance. Yellow areas are also good for attracting love and romance, but not as powerful as the red areas. The orange-colored areas fall in between the red and yellow areas in intensity. A geographic area varies from light yellow (slight romantic emphasis) to deep red (strongest romantic emphasis).

An area with no coloration is not a romantic area for you. This does not mean that your marriage will fall apart if you move to this area, or that you cannot have any romance in your life if you live in this area! It simply means that there is no astrological boost to help you attract romance into your life when you live in this area, but this fact does not mean that there is a roadblock that prevents you from finding love and romance in these geographic areas.

You should use common sense when studying your Love and Romance Map. For example, suppose that you are not married and you would like to meet someone that you can become romantically involved with. If you live in a town that you are culturally compatible with, and there are lots of unmarried people who are compatible with you, and there are social situations that are available for meeting these people, then all of this obviously works in your favor. Also, if you enjoy your work, have a productive and healthy life, then you have more to offer in a relationship than if you are frustrated, confused, and looking for a relationship strictly for your benefit rather than for the benefit of both of you.

However, some people are surprised to find a romantic partner in a small town where they least expected it, or to be unable to meet the right person in a big city with lots of attractive unmarried people. So combine the Love and Romance Map with good common sense and other information to help you find a place that is most appropriate for you! The Love and Romance Map can be used to help select a place to live or to visit.

Note also that astrology is not fatalistic. It is up to you to utilize the energies available to you in the best possible way. Astrology can help you better understand what kinds of energies underlie your present situation, and thereby help you to take the right steps to improve your life.

The Love and Romance Map shows areas where you are most likely to attract love and romance into your life. There are also qualitative differences to various geographic areas. In some areas, you are more likely to attract a dreamy romantic relationship while in other geographic areas the tendency is towards strong friendships that can turn romantic. Both areas are good for attracting romance but the quality of the influence is different. Given below is a brief explanation of the influences that are in your Love and Romance Map. If you follow the lines through the map, you will see astrological symbols in a light yellow or pink oval-shaped area. Locate the symbol on the pages below to see what the "flavor" of this influence is. In the description of these astrological influences we frequently emphasize what you can do to utilize the astrological influence to best advantage. As we said earlier, astrology is not fatalistic and should never be an excuse for failure or problems in your life. You have the ability and opportunity each day to express the energies available to you in new, creative, positive life-enhancing ways.

Some symbols have a number between 2 glyph of the planets. If the number is 20, 80, 100, 140, or 160 it will not appear in the list of symbols below, but it has the same meaning as the number 40. Here is a list of numbers that do not appear in the list of symbols below, and the number in the symbol with the same meaning:

40 is the same as 20, 80, 100, 140, and 160
 72 is the same as 36, 108, and 144.
 51-26 is the same as 25-43, 77-09, 102-51, and 154-17.

Areas of intensity on your Love and Romance Map are very sensitive to accuracy of birth time. On average, a difference of 1 minute in the time of birth can move the astrological influence about 15 miles in an east-west direction. Because it is very possible that your birth time can be inaccurate by a few minutes, you may find that the Love and Romance Map can pinpoint the towns and cities that are most suitable for you, but you must rely on your own intuition to guide you to the most suitable areas within that town.

Your Love and Romance Map is based on the most sophisticated and accurate astrological techniques available. These astrological influences have not yet been scientifically verified and astrology is a very controversial subject, but we do believe that there is validity to this map, and we hope you find it useful.
